NUMBER OF LAPS

T1

Fast right-hander taken at over 280kph, building momentum for the quick left heading into the tight and reasonably slow T3.

T4

Acts as a feeder into the T5 kink opening-up the long Wellington straight which has good overtaking opportunities with the DRS.

T7

Minimising understeer through Luffield is essential to ensure good speed down the straight, as this leads on through Copse, then subsequently into the Becketts complex and on to Stowe.

T9

Taken almost flat out, Copse is one of the most daunting corners of the season and a real test of nerve for the drivers.

T14

Overall car balance is essential through the high-speed Becketts complex, which is entered at over 300kph with only minor throttle lift through the entire series of corners.

T16

Vale is one of the slowest corners on the track – taken at around 100kph – and precedes the final right-hander of Club before the drivers pile down the start/finish straight
